

# MY CAR

**We build up our accumulated knowledge become to “MY CAR”  
That is all to offer the benefit to our customer.**

With the determination to deliver a quality product to our customer, we hold the commitment to set Master Configuration in-depth detail with meticulous to monitor workflow of DMS Process (Dealer Management System). The user can access to use program easy and convenient.

**From our experience in DMS more than 20 years, we build up our accumulated knowledge become to “MY CAR”**

“MY CAR” was developed with 3S consist of Sales, Spare Part, Service. With these 3S, each brand of dealer can manage its sales flexibly, maintain stock parts and response their customer quickly. The program will make satisfaction to car user, they will get the best service and get more information which effected with the decision to buy a car easier. Meanwhile the dealer also has a strong workflow together with its business growth and corresponding with the automotive industry which is continue growing in this era.

**That’s the reason why we receive the trust from customers with number of sales more than 1,000 licenses.**

However, we still continue to develop new innovation more over every year, especially the connection to API Facebook and Google.

**That is all to offer the benefit to our customer.**
